

CyberSentinel Report

Automated Vulnerability Scanner & Reporting Dashboard

General Information

Target	192.168.1.1
Hostname	192.168.1.1
Scan Type	quick
Scan Date	2026-07-24T03:13:04.276515
Duration	3.0s

Operating System

Not determined

Open Ports & Services

Port	Protocol	Service	Version	State
22	tcp	ssh	unknown	open
53	tcp	domain	unknown	open
80	tcp	http	unknown	open
443	tcp	https	unknown	open
1900	tcp	upnp	unknown	open

Detected Vulnerabilities

[Low] http unknown — N/A

Web service exposed. Version banner did not match a known high-severity signature in this demo's offline database.

Recommendation: Keep the web server and any CMS/framework patched; run a full vulnerability scanner for production coverage.

[Informational] ssh unknown — N/A

SSH service detected. No specific known CVE matched the reported banner.

Recommendation: Ensure key-based auth, disable root login, and keep OpenSSH patched.

Risk Score

5.0/100 — Low

Recommendations

This report uses a small offline CVE lookup table for demonstration purposes and simple substring version matching. It is not a substitute for a production-grade vulnerability management tool. Always confirm exposure manually before remediating.
